Objective

I am in search of a fast paced work environment to contribute dedication, persistence and hard work. I am excited for change. My career experiences are in the trades. I am a licensed commercial electrician and aside from the science of electricity, I lost my desire to be an electrician. Problem solving, dynamic thinking and finding efficient solutions are challenges that still excite me. In search of these job aspects, I found my desire to code, develop and design.

Skills

OS and Languages: Linux OS, Windows OS, HTML, PHP, SQL, JavaScript, CSS, Bootstrap, Angular.

Development Tools: PHPStorm, MySQL, Git, GitHub, CodePen, PHPSandbox, JSON Editor, Slack.

Other: Public speaking, practical problem solving, excellent communication, detail oriented, customer service and satisfaction, time management, self sufficient.

Experience

Technical Coach- Deep Dive Coding Bootcamp 2018

- Coach students in object oriented programming concepts.
- Coach students in understanding and utilizing wireframes, Bootstrap, and CSS.
- One on one coaching with students of particular needs.

Student- Deep Dive Coding Bootcamp 2017

- Immersive 10 week program utilizing the LAMP stack to develop websites and web applications.
- Used Test Driven Development and security to build a robust database for a social web application.
- Mobile First front end design, UI and UX, utilizing scrums, whiteboards, wireframes, sketches and frameworks.

Licensed Electrician - Albuquerque Plumbing 2016-2017

Licensed Electrician - Wagner Mechanical 2015-2016

- Design and engineer electrical systems to code compliance for residential and commercial projects.
- Taught apprentices and peers electrical code, load calculations, trade skills, and safety.
- Educated clients and managed client expectations.

Licensed Electrician – APIC Solutions 2014-2015

- Proficient knowledge of access control, surveillance, security, motor controls, and automated controls.
- Design surveillance systems for federal and state owned building and police substations.
- Completed electrical journeyman exam and obtained commercial electrical journeyman license.

Electrical Apprentice – DKD Electric 2010-2014

- Learned electrical load calculations, circuitry, theory, and troubleshooting through on the job training and classroom instruction.
- Reading and scaling blueprints and construction plans.
- Developed excellent communication between my company, other trades, and inspectors.

Education

- Deep Dive Full Stack Bootcamp – 2017
- Northern New Mexico Independent Electrical Contractors – 2010-2014
- CNM – 2006-2008
- NMSU – 2005-2006
